Education

Data analyst with a background in collaboration and public speaking, skilled in analyzing data, identifying relationships and forming conclusions, and summarizing results in a coherent manner. Make data driven decisions based on research and analysis and present findings with accessible visualizations.

(+1) 831-359-5888 robertriemer7@gmail.com

- Qualified Data Analyst with experience using Python, Excel, SQL, & Tableau.
- Experience with analyzing, cleaning, and manipulating large data sets.
- Skilled in using statistical analysis to draw conclusions and present results.
- Expertise using graphic design tools to create data visualiztions.
- Provides data reports that help companies make informed business decisions.

Influenza Season Staff Distribution

Tools: Excel, Tableau

Identified influenza risk levels for each state based on history of influenza death rates. Determined which demographics were most susceptible to the virus and identified any other risk factors. Created a staffing plan to redistribute medical staff based on state's total population and risk level.

Rockbuster Stealth Business Analysis

Tools: SQL, PostgreSQL, Tableau

Managed a large data set for a video rental service using a RDBMS and SQL. Created an ERD and a data dictionary to view data tables and execute table joins for queries. Constructed visualizations using Tableau and presented analysis findings to stakeholders with a full data report.

Instacart Customer Analysis

Tools: Python, Jupyter, pandas, matplotlib

Analyzed, cleaned, and manipulated a data set with 30+ million rows of data using Python. Identified different demographics of shoppers using for-loops to filter customers using customer data and shopping habits.
